

HADJ Saddle Series

User's manual

Important notes

■ How to use

Remove the string and turn the stud fixing the saddle to remove the attached saddle.

After aligning the studs with the HADJ saddle and checking compatibility with the bridge body, turn the studs to tighten.

Set the string lightly when entering moderate height.

Try lowering the saddle while checking the sound and tension, and find the best point you like.

■ Notes

This product is made of wood. There are some differences such as wood grain and size, color taste, texture etc. by individuals.

This product has been installed and tested only on the Gibson / Epiphone type ADJ model. Other models are not supported.
